FERROUS FOUNDRY

The industrial plant of SIMSEG's ferrous foundry uses green sand moulding process in stack.

SIMSEG produces cast iron rings, mainly for machining in its own piston rings plant production.

It also produces technical pieces with costumer's drawings and technical specifications, in grey or ductile cast iron.

SIMSEG is prepared to ensure its production quality with control equipment of material and process.

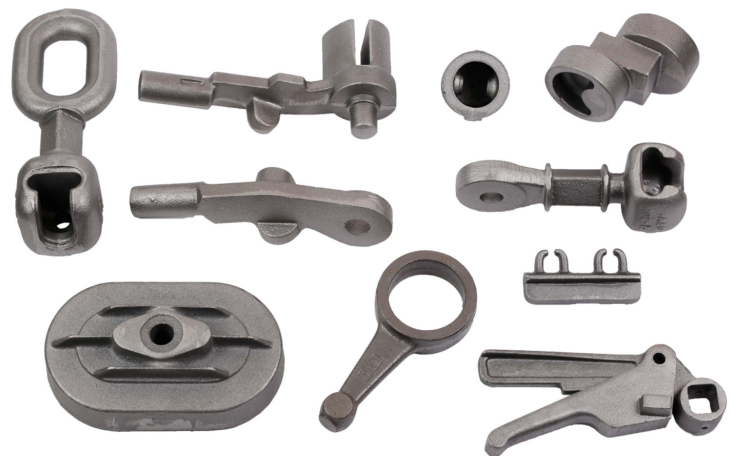

Ductile Iron

- ENGJS - 400 - 15
- ENGJS - 500 - 7

Grey Iron

- ENGJL - 200
- ENGJL - 250
- ENGJL - 300
